TO WHOM IT MAY CONCERN

BEC Holdings Limited was contracted in August 2008 to carry out the Design and Build of the 100m high 3-Flue Chimney for the 1 x 82MW Coal Fired Power Plant at Toledo, Province of Cebu, Philippines.

The Chimney was designed and constructed in accordance to the International Standards for Chimney and complied with International Quality Systems.

The job was completed on schedule and the safety & quality aspects of the works they have performed could meet the requirements of the specifications.

We would recommend BEC to any progressive clients.

Yours faithfully,

Co-Generation Department
Kaohsiung, Taiwan
