

BALANCED ENGINEERING & CONSTRUCTION PTE LTD

Company Description

BEC Specialises in design, build, repair and maintenance of industrial and commercial chimney and silos. With a number of offices in Asia Pacific Region, BEC is a market leader in this highly-specialised field, with an impressive track record. Due to our rapid expansion, we are now looking for the right candidates to join our team as:

DESIGN ENGINEER

Responsibilities:

- Plan, manage and execute designs, typically from concept through to completion and manage design changes during construction stage.
- Ensure compliance with the relevant design codes and specifications.

Requirements:

- Graduate Civil or Structural Engineer
- Minimum of at least three years design experience since graduation plus preferably at least 1 year site experience.
- Experience in the use of Singapore and British design codes and standards is essential
- Additionally, experience in the use of US design codes and standards would be preferable.
- Experience in the design and detailing of reinforced concrete essential.
- Experience in the use of SAP 2000 and MS Office is essential.
- Knowledge of Autocad would be preferable but is not essential.
- Highly organised, independent and able to work under pressure and tight schedule.
- Excellent communication and interpersonal skills.

Interested applicants are invited to write in with detailed resume stating qualifications, experience, current and expected salary to hr@be-con.com
