

Balanced Engineering & Construction Pte Ltd

PROJECT ENGINEER

Balanced Engineering & Construction Pte Ltd specialises in the design and build of industrial and commercial chimneys and silos. BEC is a market leader in this highly-specialised field, with an impressive track record. Due to award of a new project in Quang Ninh Province, we are now looking for suitable candidates to join our team In Vietnam.

Responsibilities :

- Assist Project Manager with day to day activities on site.
- Supervise team on site.
- Liaise with Client / Clients' representatives on project related matters.
- Plan, schedule and organize site labour, equipments and materials.
- Prepare work programs & method statements.
- Apply for site work permits.
- Maintain daily site diary and prepare reports on works progress and other related activities.
- Assist with implementation and maintenance of QA/QC procedures and documentation.

Requirements:

- Have a Degree in Civil or Mechanical Engineering
- Good knowledge of both written and spoken English.
- Minimum 3 years relevant experience working on construction sites, preferably in power or process plants.
- Willing to work hard and put in long hours.
- An independent person who can work with minimal supervision.
- Must be an excellent team player.
- Physically fit and healthy and not afraid of heights.
- Knowledge of MS Office.

Interested applicants who meet the above are invited to write in with detailed resume stating qualifications, work experience, current and expected salary to hr@be-con.com
